

All your debts. One plan.

For Romanians juggling several loans: what each debt really costs, what to pay first, and when refinancing truly saves money.

THE ROMANIAN MULTI-LOAN REALITY

Loans are scattered across banks, and nobody says what to do next.

3M+

Romanians hold consumer credit BNR

56%

of consumer debt is owed by people with several loans BNR

MEET RADU DEMO PROFILE

32, Cluj · 12.000 lei a month

5 debts with 5 lenders	**358.600 lei**
Paid every month	**4.500 lei**
Which one hurts most?	**no idea**

LIVE DEMO · ONE JOURNEY

Radu's month, from input to outcome.

1 · INPUT

Connect banks

Open-banking consent (simulated) and one late-payment question

0:45

2 · PROCESSING

The real picture

358.600 lei owed, 600 lei left a month, 38% of income vs the 40% BNR limit

1:05

3 · OUTPUT

What to do

+600 lei on the BCR card; refinance ING with Raiffeisen, save 3.515 lei

1:30

4 · MEANING

The goal

Debt-free Feb 2035 instead of Jun 2054

2:15

If the emulator freezes: press B for the recorded demo (1-5 jump to a phase)

HOW WE BUILT IT

Plain maths, real Romanian rules, seven AIs working through Git.

Expo · React Native · TypeScript | Firebase Auth + Firestore | Works offline | 22 automated tests | EN + RO

Real Romanian rules

BNR 40% debt-to-income limit · free early repayment on mortgages (OUG 52/2016) · at most 0.5–1% on fixed consumer loans (OUG 50/2010)

16 real offers, 7 banks

BT, BCR, ING, Raiffeisen, BRD, CEC, UniCredit · checked Nov 2026 · ranked only by the user's net saving

CLAUDE OPUS · LEAD
Plans, splits and reviews every task; designs the UI

→

CODEX
Calculation engine, tests, Firebase layer

+

4 × GEMINI
Law, offers and market research; testing; video capture

One shared repo is the only channel: approach.md (rules) · decisions.md · tasks.md (task board) · the git log is the activity log

REAL VS. MOCKED · ALSO INSIDE THE APP UNDER ⓘ

Honest about what is real.

Real

- The calculation engine: real cost, payoff order, savings after every fee, eligibility
- 16 public bank offers, the BNR limit and the legal fee caps
- Firebase: accounts, profiles, bank snapshots, sent applications

Mocked

- The live bank connection (realistic demo data instead)
- The three demo people and their transactions
- A bank receiving the application

Limits: offers are a snapshot without personal pricing · eligibility is an estimate · no credit-bureau data (no public API)

WHY PEPLUS · HOW WE EARN

RADU, BEFORE → AFTER MEASURED BY THE ENGINE

~~2054~~ → 2035

Debt-free **19 years sooner** by keeping today's payment, plus **3.515 lei** saved by refinancing one loan

Bank apps

See only their own loans, never tell you to pay off a rival first

Comparison sites

List rates, but don't know your budget or if you'd qualify

PePlus

Every debt, this month's exact move, refinancing only when it saves

The person in debt pays	**0 lei**
Partner bank pays a referral fee, only when a refinancing closes MARKET BENCHMARK	**1.2% mortgage · 2.5% personal**
The fee never changes the order: offers are ranked by the user's saving	**by saving**

NEXT STEP

From demo to pilot.

- Register with **ANPC** as a credit intermediary
- Connect real banks through a **licensed open-banking partner**
- Pilot with **two partner banks**

Scan to try PePlus. Thank you.

1 · HOME

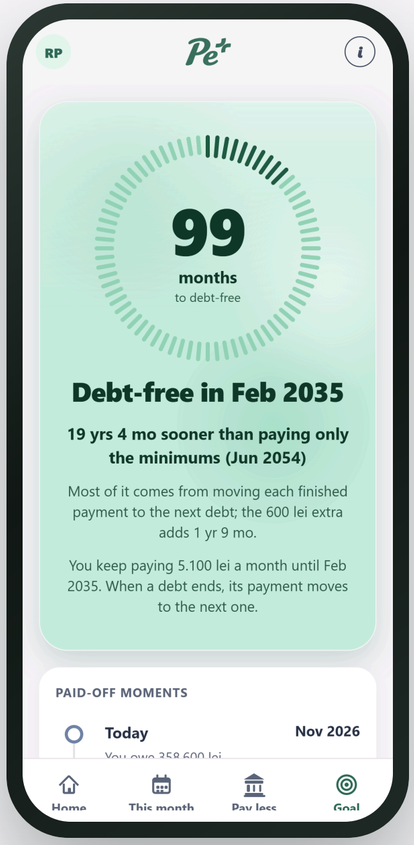

2 · THIS MONTH

3 · PAY LESS

4 · GOAL

BACKUP · NUMBERS MEASURED BY THE ENGINE

19 years sooner, and a refinance that pays for itself.

232 mo

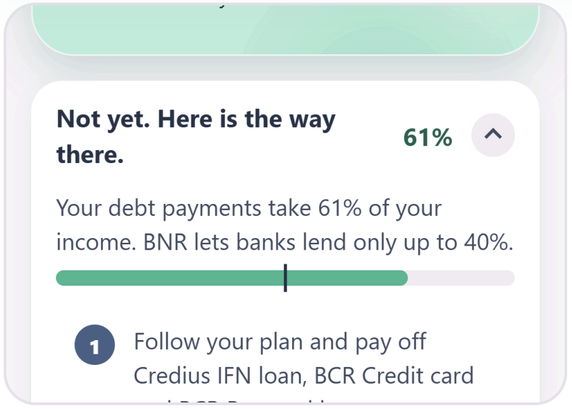

sooner: **Feb 2035** instead of **Jun 2054**. Almost all of it comes from rolling finished payments into the next debt; the 600 lei extra adds 1 year 9 months

3.515 lei

net saving, ING loan → Raiffeisen 6.25% fixed · **1.085 → 1.004 lei** a month

2.799 lei

a month Radu pays today in interest and fees

Over the limit? We don't just say no.

Elena pays **61.3%** of her income to debt. PePlus maps the way: follow the plan, pay off three debts, and by **Mar 2029** she is at 19%, eligible to refinance the rest.

BACKUP · BUSINESS MODEL ASSUMPTIONS

How the referral fee adds up.

Referral fee, market benchmark	**1.2% mortgage (~3.600 lei) · 2.5% personal (~950 lei)**
Year 1 users (assumed)	**25.000**
Closing rate: 60% eligible × 18% apply × 40% approved (assumed)	**4.3% → 1.075 loans**
Year 1 revenue (assumed)	**2.02M lei**
Open-banking cost per user (aggregator pricing)	**~9 lei / year**

Sources: docs/business-model.md, docs/research-market.md

BACKUP · ELENA

Over the limit: the way there

61% debt-to-income and 670 lei a month short; the app shows the path to eligibility by Mar 2029.
